

Important News about Royal Mail's Customer Barcode Products

Thursday, 17 May 2007

Last Updated Thursday, 17 May 2007

From 1st May 2008, every Customer Barcode (CBC) bulk mailing will need to feature a minimum Delivery Point Suffix (DPS) accuracy rate of 80%.

RnB's mailsort software generates the DPS during the data processing stage so we can report back on the accuracy before the mailing goes any further.
